

LEFT HANDLEBAR SWITCH

Ref. **JP PS KT023**

TECHNICAL FEATURES

- CNC-machined anodized aluminium body
- stronger and lighter than the original part
- IP69K protection
- laser engraving
- wired with RAYCHEM 105° cable and sealed with RAYCHEM S1125 resin

INSTALLATION

This product is plug-and-play, no modification is required on the bike:

1. make sure the ignition is turned off
2. disconnect and remove the original handlebar switch (refer to the manufacturer's workshop manual)
3. install the JETPRIME handlebar switch on the handlebar using the provided bolts, and tighten to 10 Nm
4. connect the wiring to the original connectors

NOTE

Before installing the Jetprime handlebar switch, it is recommended to disable the backlight of the original switches through the motorcycle's settings menu.

This procedure can also be carried out after installing the Jetprime handlebar switch; however, it is preferable to perform it beforehand to prevent error messages from appearing on the dashboard.

NOTE

It is recommended to position the electronic box as shown in the photo, inside the fairing, in a protected area away from possible impacts and heat sources.
